Fn + }]	Speed Up	10 adjustable levels, 6th level by default
Fn + Tab	Restore Defaults	Press and hold for 5 seconds; red LED flashes 3 times to complete reset

V. Special Gaming Functions

Key Combination	Function Name	Description
Fn + Q (Configure via driver first)	Double Keystroke (DKS)	Output A/D when pressed and D/A when released, ideal for quick stops in Counter-Strike
Fn + E (Configure via driver first)	Dual-Key SOCD	Last-input priority, suitable for strafing and quick stops in Counter-Strike / Valorant
Double Keystroke (DKS) enables faster single-key quick stops for Counter-Strike. Dual-key Last-input Priority (SOCD) works for dual-key quick stops in Counter-Strike and strafing in Valorant. Enable and configure functions in the driver first, then turn them on or off with the shortcut keys.
