Fn + F	Brightness Down	10 adjustable levels, max brightness by default
Fn + G	Brightness Up	10 adjustable levels, max brightness by default
Fn + H	Animation Speed Down	10 adjustable levels, level 6 as default
Fn + J	Animation Speed Up	10 adjustable levels, level 6 as default
Fn + Tab	Restore Factory Defaults	Hold for 5 seconds; red light flashes 3 times upon reset

V. Special Gaming Functions

Key Combination	Function Name	Application Scenarios
Fn + Q	Dual Key Trigger (DKS)	Quick stops in CS
Fn + E	Last Input Priority (SOCD)	Strafing & quick stops in CS / VALORANT

Dual Key Trigger (DKS) enables faster single-key quick stops, ideal for single-tap stops in CS. Last Input Priority (SOCD) supports dual-key quick stops in CS and strafing in VALORANT. After enabling and configuring these functions in the driver, you may toggle them via the shortcut combinations above or directly using the on/off switches within the driver software.
