

一、Basic Shortcuts

Key Combination	Description	Key Combination	Description
Fn + Esc	Input `	Shift + Esc	Input ~
Fn + <	Pause	Fn + >	Print
Fn + /	Ins	Fn + ↑	PgUp
Fn + ←	Home	Fn + ↓	PgDn
Fn + →	End	Fn + Shift_R	Del
Fn + 1	F1	Fn + 2	F2
Fn + 3	F3	Fn + 4	F4
Fn + 5	F5	Fn + 6	F6
Fn + 7	F7	Fn + 8	F8
Fn + 9	F9	Fn + 0	F10
Fn + -	F11	Fn + +	F12

二、Multimedia Controls

Key Combination	Description
Fn + Z	Play / Pause
Fn + X	Stop
Fn + C	Previous Track
Fn + V	Next Track
Fn + B	Mute
Fn + N	Volume Down
Fn + M	Volume Up

三、Office Special Functions

Key Combination	Description
Fn + Win	Lock / Unlock the Win key; white LED lights up when locked (no light indicator on non-RGB version)
FN+ALT_R	Switch between Gaming mode (with configurable actuation point) and Office mode (default 2mm actuation point)
Fn + Enter	Toggle between Number and Fn functions; white LED lights up on the F-row when active (indicator blinks on non-RGB version)

四、RGB Backlight Control

Key Combination	Function	Status Description
Fn + ' "	Lighting Effect Switch	Cycles through all lighting effects (not available on non-RGB version)
Fn + ; :	Color Switch	Switches colors in color-changing effects (not available on non-RGB version)
Fn + L	Lights Off / On	Global toggle with power-off memory (not available on non-RGB version)
Fn + O	Brightness Down	10-level adjustment, default at maximum (not available on non-RGB version)
Fn + P	Brightness Up	10-level adjustment, default at maximum (not available on non-RGB version)
Fn + { [	Speed Down	10-level adjustment, default at level 6 (not available on non-RGB version)
Fn + }]	Speed Up	10-level adjustment, default at level 6 (not available on non-RGB version)
Fn + Tab	Restore Defaults	Hold for 5 seconds; red LED flashes 3 times to reset (indicator blinks on non-RGB version)

五、游戏特殊功能

Key Combination	Function Name	Description
Fn + Q (after enabling in driver)	Single-Key Dual Trigger (DKS)	On press: outputs A/D; on release: outputs D/A. Ideal for CS counter-strafting
Fn + E (after enabling in driver)	Dual-Key SOCD (Last-Input Priority)	Last input wins; ideal for CS / VALORANT strafe shooting and counter-strafting

Single-Key Dual Trigger (DKS) enables faster single-key instant stop, ideal for CS single-key counter-strafting; Dual-Key Last-Input Priority (SOCD) suits CS dual-key instant stop and VALORANT strafe shooting. After enabling the function in the driver, use the key combination to toggle it on/off.
